-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "image formation equipment" in claim 8 is a relative term which renders the claim indefinite. The term "image formation equipment" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. It can not be determined what, if any, degree of limitation this language is intended to add to the scope of the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Demou et al. in view of Fujita et al.

Demou et al. discloses preparations of elastic polyurethane foam compositions prepared by mixing and reacting isocyanate based components, isocyanate reactive components, blowing agents and silicone based modifiers which include siloxane-

oxyalkylene copolymers which encompass the foam stabilizers as claimed by applicants (see column 3 lines 26- column 4 line 66, the examples, as well as, the entire document).

Demou et al. differs from the claims in that the active hydrogen containing silicone oils claimed are not employed as silicone based additives in their disclosure. However, Fujita et al. discloses the employment of the compounds claimed in isocyanate based polymer preparations for the purpose of reducing tackiness in articles prepared (see column 1 line 42 – column 6 line 59, as well as, the entire document). Accordingly, it would have been obvious for one having ordinary skill in the art to have employed the silicone oils of Fujita et al. in the preparations of Demou et al. for the purpose of alleviating tackiness of products realized in order to arrive at the products of applicants' claims with the expectation of success in the absence of a showing of new or unexpected results.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Burkhart et al. discloses interesting articles in the art, as well as, the art's recognition of HR foams to be highly elastic (see column 1 line 27, as well as, the entire document). Nodelman et al. and Werner et al. are cited for their disclosure of relevant materials in the art.
